Permanent Removal of Workbench Export Endpoint

Bulletin Date: 11/25/2026

In November 2023, Tenable announced the deprecation of the Workbench Export Endpoint in Tenable Vulnerability Management.

This bulletin is to announce the permanent removal of the Workbench Export Endpoint on 2/1/2027. Table 1 describes the milestones and definitions.

Table 1. Milestones and Dates for the Workbench Export Endpoint:

Milestone	Definition	Date
Original Endpoint Deprecation Announcement	The date at which the deprecation of the endpoint was announced.	11/1/2023
Permanent Removal of Endpoint	The last date the endpoint can be used.	2/1/2027
Last Date of Support for the Endpoint	The last date to receive support for the endpoint. After this date, support is no longer available.	2/1/2027

Product Migration Notes

The Workbench Export Endpoint has been deprecated for over three years and will be permanently removed on 2/1/2027.

There are replacement endpoints available. Please migrate your workflows to these as soon as possible:

- Vulnerabilities (/vulns/export): https://developer.tenable.com/reference/exports-vulns-request-export
- Assets (/assets/v2/export): https://developer.tenable.com/reference/export-assets-v2

Both endpoints are available now.

Tenable Technical Support

Technical support is available to ensure your technical issues or usage questions are resolved in a timely manner. Tenable support experts are available 24 hours a day, 7 days a week, and are available via a variety of convenient methods, including the Tenable Community, phone, and chat.

Customers with Tenable Technical Support are entitled to a number of predetermined technical support contacts who may: create cases, search the knowledge base, review product documentation, and download software updates.

For more details, please refer to the Tenable Technical Support Guide.
