

Tenable Vulnerability Management API update

What is changing:

The “list_scans” API endpoint will be updated to enforce pagination on January 19, 2027. When this change occurs customers will need to be aware of the following:

- By default the number of returned scans will be limited to 200
- The maximum number of returned scans will be limited to 5000
- These are set by the “limit” integer in the API query

FAQs:

Q. Why are we doing this?

To ensure consistent API performance across all of our customers, regardless of deployment size.

Q. Is there any action I need to take??

If you currently programmatically call this endpoint, you should be aware of the new pagination threshold and adjust your API queries or any scripts making these queries accordingly.

Q. Is there documentation I can read about the new API functionality before it is released so I can prepare?

Yes. You can find the new List Scans API details here:

<https://tenable-early-access.readme.io/reference/scans-list>

Note: See the “limit” query parameters in the above link.

Tenable Technical Support

Technical support is necessary to ensure your technical issues or usage questions are resolved in a timely manner. Tenable support experts are available 24 hours a day, 7 days a week, and are available via a variety of convenient methods, including the Tenable Support Portal, phone, email and chat.

Customers with Tenable Technical Support are entitled to a number of predetermined technical support contacts who may: create cases, search the knowledge base, review product documentation, and download software updates. For more details, please refer to the [Tenable Technical Support Guide](#).

Tenable Professional Services

Tenable offers a wide range of services programs to maximize the impact of your investment. With professional services from Tenable and our certified partners, you can reduce your IT risk quickly and achieve rapid time to value. From advisory

workshops and quick deployment options to periodic health checks and custom services, we enable you to realize the full potential of your investment. Our team goes beyond basic installation services to partner with you, ensuring your success before, during and after deployment. For more information about Tenable Professional Services, refer to: <https://www.tenable.com/services>.
