

Updated: 05/11/2026

# Tenable announces the move from Amazon Linux to Ubuntu for AWS Nessus BYOL AMI's - June 2026.

## Product Migration Notes:

Amazon Linux 2 will End of Life on June 30th. Before that date, Tenable suggests replacing existing Nessus BYOL Amazon Linux 2 AMIs with the new Nessus AMIs, which will use Ubuntu as the base operating system. The new AMIs will be the Tenable Nessus (x86\_64) AMI, and our new offering, the Tenable Nessus (arm64) AMI. These will be available by June 15th 2026.

## FAQs:

### Q. Why are we doing this?

- A. Amazon Linux 2 will enter end-of-life on June 30th 2026 and we are taking the opportunity to migrate to an operating system that has longer support cycles.**

### Q. Is there any action I need to take??

- B. Yes, if you currently have BYOL Nessus AMI instances deployed, you should update to the new AMI upon its release as soon as feasible to maintain supportability.**

## Tenable Technical Support

Technical support is necessary to ensure your technical issues or usage questions are resolved in a timely manner. Tenable support experts are available 24 hours a day, 7 days a week, and are available via a variety of convenient methods, including the Tenable Support Portal, phone, email and chat.

Customers with Tenable Technical Support are entitled to a number of predetermined technical support contacts who may: create cases, search the knowledge base, review product documentation, and download software updates. For more details, please refer to the [Tenable Technical Support Guide](#).
